

ACCOMMODATION OPERATIONS

An Accommodation Operations Course curriculum focuses on the management, maintenance, and service delivery of lodging facilities, combining housekeeping, front office operations, and guest services. Core topics include room cleaning, reservation systems, property management systems (PMS), security, and facility management, usually featuring practical industry management.

Core Curriculum Components:

- **Housing keeping Management:** Room inspection, cleaning techniques, linen management, laundry operations, cleaning equipment and agents, and interior decoration.
- **Front Office Operations:** Guest checking/check-out procedures, reservations, handling guest inquiries, concierge services, and night auditing.
- **Hospitality Technology:** Use of computerized Property Management Systems (PMS) for reservations, room assignment, and billing.
- **Security and Safety:** Key control protocols, emergency procedures, health and safety regulations, and security of guest property.
- **Interpersonal and Management Skills:** Professional etiquette, customer service excellence, stress management, staff scheduling, and inventory control.
- **Practical Training/Industrial Attachment:** Typically includes a 320-hour (or longer) internship in a hotel or hospitality establishment to gain real-world experience.

Common Course Levels:

- **Certificate:** Focuses on operational roles like room stewards and front desk attendants
- **Diploma:** Covers supervisory and management skills in addition to operations.

Important:

If you'd like, I can:

- Find the full, detailed syllabus for a specific certification level (Like level 4/5)
- Highlight specific modules on sustainability on sustainability or revenue management.
