

COSMETOLOGY

A comprehensive cosmetology course curriculum prepares students for licensure by covering hair design, chemical services, skincare, nail care, and salon management, typically involving 1,000 - 1,600 + hours of training. Key areas include **sanitation** (sterilization techniques), haircutting/styling, coloring, chemical reformation (perms/relaxers), **Makeup application**, and **spa treatments**.

Key Curriculum Modules and Components

- **Hair Care & Styling:** Shampooing/conditioning, plaiting, braiding, thermal styling, wig application, and hair extensions.
- **Chemical Services:** Permanent waving, chemical hair relaxing, and hair coloring techniques.
- **Skincare & Beauty:** Facial treatments, skin analysis, eyebrow shaping, eyelash treatment, and hair removal (waxing).
- **Nail Care:** Manicure, pedicure, and nail art.
- **Professional Practices:** Salon health and safety procedures, salon management, and customer service skills.

Training Structure

- **Theory & Hands-on:** Instruction includes lectures, demonstrations, and practical, hands-on practice, often using mannequins before working on clients in a clinic setting.
- **Safety Protocols:** Intensive focus on sterilization, sanitation, and infection control in compliance with state regulations.
- **Professional Development:** Training on career planning, communication, and professional ethics
- Programs are typically structured as Grade 3 (12 months up to Grade 1 (6 Months) for advanced training, often aligned with national vocational standards.
